

FileWriter e BufferedWriter

<http://educandoweb.com.br>

Prof. Dr. Nelio Alves

Classes

- FileWriter (stream de escrita de caracteres em de arquivos)
 - <https://docs.oracle.com/javase/10/docs/api/java/io/FileWriter.html>
 - Cria/recria o arquivo: **new** **FileWriter**(path)
 - Acrescenta ao arquivo existente: **new** **FileWriter**(path, **true**)
- BufferedWriter (mais rápido)
 - <https://docs.oracle.com/javase/10/docs/api/java/io/BufferedWriter.html>

```
package application;

import java.io.BufferedWriter;
import java.io.FileWriter;
import java.io.IOException;

public class Program {

    public static void main(String[] args) {

        String[] lines = new String[] { "Good morning", "Good afternoon", "Good night" };

        String path = "C:\\temp\\out.txt";

        try (BufferedWriter bw = new BufferedWriter(new FileWriter(path))) {

            for (String line : lines) {
                bw.write(line);
                bw.newLine();
            }

        } catch (IOException e) {
            e.printStackTrace();
        }

    }
}
```

Manipulando pastas com File
